2) Basis of accounting and preparation of financial statements

The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 and Companies (Accounting Standards) Amendment Rules, 2017. All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

Statement of significant accounting policies

a) Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Except in cases of contractual commitments, revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

(i) Sale of goods is recognized on shipment or dispatch to customers when the risks and rewards of ownership are transferred to the customer. Sales are net of GST, returns, trade discounts, and volume rebates

(ii) Revenue from Service is recognized in the statement of profit and loss once the service is rendered to the satisfaction of the customer and the right to receive the amount is established. Revenue is recorded net of discounts and tax if any.

(iii) Interest income is accounted for on a time proportion basis taking into account the amount outstanding and the rate applicable

(iv) Dividend income from investments is recognized when the Company's right to receive payment is established

(v) Commission income on indenting business is recognized based on intimation received for sales made

c) Property, Plant and Equipment and Intangible Asset

Cost includes financing costs of borrowed funds attributable to the acquisition or construction of qualifying fixed assets, up to the date the assets are put to use.

Acquired intangible assets are recorded at their acquisition price and amortized over their estimated useful life as per the Company's depreciation/amortization policy.

d) Depreciation and Amortization

Property, Plant, and Equipment are depreciated on a written down value basis applying the rates specified in Schedule II to the Companies Act, 2013 as under :

Assets	Useful Lives
Furniture, Fixture & fittings	10 years
Office Equipments	5 years
Computers (desktops, Laptops)	3 years
Vehicles	8 years

Intangible Assets are amortised on the straightline method over a period of five years.

e) Investments

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long-term investments. Current investments are valued at a lower of cost and fair value. Changes in the carrying amount of current investments are recognized in the Statement of Profit and Loss. Long-term investments are valued at cost, less any provision for diminution to recognize a decline, other than temporary, in the value of such investments; decline, if any, is charged to the Statement of Profit and Loss. Cost comprises the cost of acquisition and related expenses such as brokerage and stamp duties.

NOTES TO THE FINANCIAL STATEMENTS

f) Inventories

Inventories are valued at a lower of cost and net realizable value. Costs ascertained on a moving weighted average basis except for goods in transit which are ascertained on a specific identification basis. Work-in-progress and manufactured finished goods are valued on a full absorption cost basis and include material, labor, and factory overheads.

g) Foreign currency translation

Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of transaction.

Conversion

Foreign currency monetary items are reported using the exchange rate prevailing at the reporting date.

Exchange differences

Exchange differences arising on the settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded are recognized as income or as expense in the Statement of Profit and Loss for the year. Monetary item having Closing Balances at end of the year are recorded at closing rate.

h) Income Taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

At each reporting date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

i) Provisions

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

j) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

k) Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.
